

Corporate Profile

OneGIS is a full service, GIS consulting, system integration and outsourcing firm specializing in the development and installation of turnkey solutions for the utility and municipal government markets. We deliver both off-the-shelf and custom solutions that provide a true business benefit to our clients. We strive to achieve the highest level of usability and performance in all applications delivered – solutions that you can be proud of and confident in for years to come. OneGIS focuses all development and implementation efforts solely on ESRI based applications. We provide the very best product we can using the highest quality, open and configurable GIS platform available in the market place.

OneGIS clients rely on us to be their GIS solutions provider. Our unique set of skills, knowledge and insight work together to help you meet your business and operational objectives. With our standards based approach to developing enterprise solutions, you can recognize the competitive advantage that a properly-executed and integrated enterprise geospatial information management approach brings to your business.

OneGIS' internationally experienced professionals deliver cost effective, consistent consulting services at our client sites. Our mission is to help our clients and our employees succeed at everything they do together.
