

For Immediate Release

OneGIS Announces Recent GIS Implementation Contracts Achieves Sales Record in First Four Months of 2005

Atlanta GA, May 12, 2005 – OneGIS is pleased to announce that it has received a number of new GIS implementation contracts in the first four months of 2005. Among these include contracts for new clients in the municipal utility and electric cooperative markets as well as new custom interface development and support engagements for existing clients.

Among the new wins for OneGIS are: Appalachian Electric Cooperative, New Market, Tennessee; Black River EMC, Sumter, South Carolina; Bristol Tennessee Essential Services; the City of Concord, North Carolina; the City of Ponca City, Oklahoma; the City of Salisbury, North Carolina; the City of Wilson, North Carolina; and Tri-County EMC, Azle, Texas.

Among existing clients, Bahamas Water and Sewerage Corporation; Nassau, Bahamas; Bermuda Electric Light Company (BELCO), Hamilton Bermuda; the City of Leesburg, Florida; Habersham Electric Membership Cooperative, Clarkesville, Georgia; and LaGrange County REMC, LaGrange, Indiana; contracted for continued implementation support from OneGIS.

In addition to installation and implementation services, OneGIS is providing custom interfaces between clients' GIS and their Customer Information System (CIS), Work Management System (WMS), Engineering Analysis (EA) and Staking/Design software.

Mr. Chris Cirillo, President of OneGIS commented, "We are pleased that so many utilities are discovering the value in having OneGIS provide implementation services to realize true business benefit from existing and new operational systems. We will continue to offer outstanding value for our clients by making them productive in the shortest amount of time possible on the best GIS software available – ArcGIS from ESRI."

About OneGIS

OneGIS, Inc. is a full service consulting and outsourcing firm specializing in the development of turnkey GIS solutions for the electric, gas, water, wastewater, storm water, and municipal government markets. Its goal is to provide off the shelf solutions that provide significant business benefit to organizations implementing Geographic Information Systems. OneGIS focuses its development, customization, and implementation efforts solely on ESRI-based applications, thus offering solutions on the best GIS platform available in the market place.
